Education

University of California, Los Angeles - B.S. Computer Science and Engineering 2019

3.85/4.00 GPA

Coursework: Data Structures, Algorithms, Operating Systems, Databases, Machine Learning, A.I.

Awards

Dean's Honors List - Years 1, 2, 3

SD Hacks 2017 - 1st Place in Genome Link Category Oct./2016

SD Hacks 2016 - 1st Place in ViaSat Category: Best Communication Hack Oct./2016

AT&T Hackathon - 1st Place in Teen Category Oct./2012

Activities

IEEE -

PM '18-'19 | Workshops Manager '17-'18 | OPS Lead '16-'17 | Member '15 - Current

- Sept./2015 to Current

TBP at UCLA -

Club Liaison '17 - '18 | Member '17 - Current

- Dec./2017 to Current

HKN -

Membership Chair '17 - '18 | Member '17 - Current

- April/2017 to Current

Super Mileage Vehicle -

Electric Vehicle Team '15 - '17 - Sept./2015 to June/2017

Employment

UCLA Scalable Analytics Institute - Undergraduate Researcher

Jan./2018 to Current

Researching under Dr. Carlo Zaniolo and PhD student Ariyam Das on real time data-stream databases and graph visualizations:

- Creating an NLP tool for easily writing Datalog queries using natural English semantics
- Using Node JS, Express and native JavaScript to create UI for streaming utility
- Built an n-ary And-Or tree parser using Java for use in the querying system

Facebook - Test Automation Engineering Intern

June/2018 to Sept./2018

Bridged the functionalities of several existing tools to create a single more coherent automated testing tool for testing and validating new servers

- Modified existing UI and created more functionalities for managing the test suite using Hack and JavaScript
- Automated the creation and updates of test results in the Python backend
- Sped up server reservations and the end-to-end testing process for faster validation turnarounds
- Used Apache Thrift to connect the frontend UI to the backend Python server

ViaSat - Software Engineering Intern

June/2017 to Sept./2017

Created the infrastructure to transport data off airplane routers, process it, and then visualize it for business analytics:

- Used Docker containers and Apache Flume to create a flow of data off routers into our hands
- Automated the infrastructure deployment and AWS/VMware provisioning process with Ansible
- Processed Spark streams using Scala and stored the processed data into OpenTSDB
- Graphed data in Grafana to let business leaders make critical decisions of the Arclight network

Reltio - Software Engineering Intern

June/2016 to Aug./2016

Worked on the company's Master Data Management product to tailor it to customers' needs:

- Developed and modified features in the API (Java, Cassandra, Elasticsearch) and the UI (Qooxdoo JS)
- Found and fixed major bugs within the product's code base before it was deployed
- Gained a critical understanding of the SaaS model of service and used Git extensively to collaborate with developers around the world

SmartMonitor and IntelliVision - Software and Product Development Intern

June/2014 to Aug./2014

Concurrently interned at two companies, splitting my time accordingly to the tasks given:

- Tested SmartMonitor's product, a smart watch for epileptics, and assisted in designing and pitching a new product to other companies
- Created a website for one of the IntelliVision's products and tested proprietary software for accuracy to optimize the customer's experience

Personal Projects

Trivia Bot

Jan./2018 to May/2018

- Created a python bot to assist me and my friends during trivia games

Bruin Dining Backend

May/2017 to Oct./2017

- Published an API endpoint to grab various information about UCLA dining items

Micromouse 2016

Sept./2016 to June/2017

- Designed the PCB and programmed the MCU for an autonomous maze solving robot

C.A.R.M.

Oct./2016 to June/2017

- Published a Chrome extension for users to message others on the same website

REM.my

May/2016 to Dec./2016

- Published an Android application for those with dynamic sleep schedules
